Tomás Sandoval

Software Developer

👤 Profile

Full Stack Web Developer with strong knowledge in JavaScript, Python, React.js, React Native, Node.js, SQL, MongoDB, and agile methodologies. During my training, I have worked on various projects, both individually and as part of a team, focusing on creating robust and scalable solutions. My greatest achievement has been the personal and professional growth I have gained through these experiences. I am eager to apply my skills and knowledge in the IT industry and contribute to challenging projects alongside a team. My short-term goal is to further develop my technical and soft skills and continue learning in a stimulating work environment.

Henry, Buenos Aires

Febraury 2023 - July 2023

Full Stack Web Developer

⭐ Highlighted Projects

TukiMarket

- Description: TukiMarket is a professional E-commerce platform focused on the buying and selling of any product. It features a payment gateway, shopping cart, third-party authentication, user dashboard, seller section, among other functionalities that make it a dynamic E-commerce platform for users. It was built using React and Node.js, and libraries such as Auth0, JWT, Bootstrap, Google Analytics, among others, were implemented to provide design and functionality to the site.
- My role: I served as the front-end developer on the team, taking charge of designing and developing the client-side component in collaboration with my teammates. *You can find it in the portfolio section of my website.*
